Maroon 5, Figure It Out

I'm happy you came to me first Before the bubble burst I'm happy you answered my calls I'm bouncing off the walls Impossible to be tamed Her need... cellphone I'm happy you like to play games Why did you run away?

We could spend some time together What he had he'll never know Your boyfriend gives you no repect And I can see your getting it So let's figure it out let's go.

I'm happy you're so impulsive
Means that your passionate
I'm happy you're moving so fast
But will it ever last
I know you wanna break free
From this monotony
I'm happy you're coming with me
But by choice it's gotta be

We can spend some time together What he has he'll never know Your boyfriend gives you no repect And I can see your getting it

So figure it out let's go

I'm happy you're changing your speed Slow down and lay with me On bottom but always discrete Kneel down and kiss her feet I'm happy your going too far Full strength before we start Sometimes you make it so hard Scream loud as we come apart

We can spend some time together What he had he'll never know Your boyfriend gives you no repect And I can see your getting it So figure it out let's go

We can spend some time together What he has he'll never know Your boyfriend gives you no repect And I can see your getting it So figure it out let's go Figure it out let's go Figure it out let's go Figure it out let's Go.
