## Martin Sexton, Faith On The Table

When you're down and feeling left out
Wondering what this pain is about
Here's something mother taught me
When I was a child
It's passed down from an old generation
To let us all in on the new revelation
See the light and comfort will be on the way

I've got a little faith on the table Find a little hope in the jar There's got to be sanity 'round here somewhere And then shake it up.

A simple message, simple virtues three But it's not as easy as it looks on TV Mix these with a little bit of sadness And you will find the joy, practice boy.

I've got a little faith on the table Find a little hope in the jar There's got to be sanity 'round here somewhere And then shake it up.

And with your honesty and your open mind Find the willingness of a child

It helps a lot when I don't act like a loser But I know mama these lyrics gonna confuse ya It's like a sudsy train raging through my one track mind.

I've got a little faith on the table Find a little hope in the jar There's got to be sanity 'round here somewhere And then shake it up. Got to shake it up.
