

Martin Stosch, I can reach heaven from here

Calling the landslide
Twisted and turning
Calling the shadows
When you reach for my hand
Just like an angel
You brought me to saved it
You took me to a higher place
And showed that you really love me
Lies are gone, skies are clear
You made the darkness disappear
I can reach heaven from here
From here to fall
You're the light inside my heart, my guarding star
I'm not afraid of falling
I'm not afraid to feel
Standing on the shoulders of your love
I can reach heaven from here
I knew that I loved you
From the first time I saw you
I knew that I loved you
There was no turning back
Just like an angel
You answered my call
You took me to a higher place
And showed me that you really love me
Lies are gone, skies are clear
I can reach heaven from here
From here to fall
You're the light inside my heart, my guarding star
I'm not afraid of falling
And I'm not afraid to feel
Standing on the shoulders of your love
I can reach heaven from here
Nothing seems impossible to me
You're the leaved in me
Your finding makes me see
I can reach heaven from here
From here to fall
You're the light inside my heart, my guarding star
I'm not afraid of falling
I'm not afraid to feel
Standing on the shoulders of your love
I can reach heaven from here
I can reach heaven
No, I'm not afraid of falling
I'm not afraid to feel
Standing on the shoulders of your love
Standing on the shoulders of your love
I can reach heaven from here
I can reach heaven
