Masterboy, Is This The Love

Is this the love
I got to feel the music
Is this the love
-Watching you, watching meIs this the love

Came in this place, and saw your face I saw you dancing, dance to trance Your body's swing, made my bells ring I wished that we started romance All the people in the house They share our destination Love, groove, dance and sex That's party combination Burn, burn, our hearts burn To the point of no return Burn, burn, our hearts burn To the point of no return Move, move, on and on Come on, people, get it done

Move, move, on and on Come on, people, get it done

Time is right to get all up Feel the music's energy This dance will bring us to the top Forget all days' misery Nightime makes us sensitive For dance and sax and laughter Forget about all negative And get the things you're after Come on, come on, get it done Come on, come on, get it done Sensitive, you're sensitive Forget about all negative Feel the music's power now Come close to me I'll show you how Music's beat flys through the air Here, there and everywhere
