

Mat Kearney, Straight Away

This moment right here is one we can't suspend
Your breathe and mine tells me just where I have been
You know the song of long lost cause
We're running in circles and coming back again
Now could I go the long way
Taking the easy way down?
If I was wrong would you show me
Where all that I lost can be found?
'Cause you can shoot me straight
Straight to the heart 'cause you already have it
Say what you wanna say, we're coming out of the gray
What goes around now is coming back down today
You can shoot me straight away
Don't wanna fight and you don't wanna lose control
We're losing light and the night is getting cold
Everyone wants to hear their story told
We're not the only ones, we're not the only ones
And now could I go the long way
Taking the easy way down?
If I was wrong, would you show me
Where all that I lost can be found?
'Cause you can shoot me straight
Straight to the heart 'cause you already have it
Say what you wanna say, we're coming out of the gray
What goes around now is coming back down today
You can shoot me straight away
And you wanted to fly and leave it behind
But you know it's gonna come back one day
'Cause you can shoot me straight
Straight to the heart 'cause you already have it
Say what you wanna say, we're coming out of the gray
What goes around now is coming back down today
You can shoot me straight away
