matchbox twenty, Crutch

Chorus:

I don't want to be the crutch one step away from down I don't want to be the crutch one step away from ...

Man I feel like hell, so come on over
Be a love machine and I could be your friend
Ain't no shame, feel strong for one another
Make a real true color come end to end, then
God damn. Change of pace
I think you got a piece of my heart on your
face
It's a shame to let it waste

How does it taste?

Break it down in pieces, make it simple cause you know damn well that I'm a simple man All these things go changing like the weather and they stay that way until the weather man says one down, gone to waste I think there's still a piece of that smile on your face and I would like it erased There ain't no two ways about it.

Chorus (1x)

Bring it on then gone, use a lover like a cigarette the way that lovers do One sweet song that starts a little slow and then goes on and on and makes you want to move around the room in circles Everybody wants to be you Try to find my place up on the map Of all the men you've been through dig a little deeper and you'll realize all I'm building up you're tearing down.

Chorus (1x)
