

# Mates of State, Halves And Have-Nots

I know you're not playing around  
But I know you will

But what do you say  
When things just won't got your way?  
Cut around and surround us

I know you're not playing around  
But I know you will

Half-tired and now I know your sorrow  
Half-wiser and now I know you're right

We separate sometimes, everyone starts it off  
Half tired and now I know your sorrow  
Never stay alone

You run up, you run up and you want some  
Ride on the way down

Prepare it and half-truth ends tomorrow  
Half tired and now I know you're right

We separate sometimes, everyone starts it off  
Prepare it and half-truth ends tomorrow  
Never stay alone

You run up, you run up and you want some  
Ride on the way down

It's one up, it's one up  
It's the latest version of its kind

We will laugh, we will laugh  
Of how our nerves caught and held us down

You run up, you run up and you want some  
Ride on the way down

I know you're not playing around
