

Matisyahu, Heights

Well I be rippin' to them lyrics, I be rippin' into them words
Explain like physics leavin your vision blurred
All of them, all of them righteous men there is no need to worry
Crush into the wicked into my way with all these fists of fury
I study rhymes all day
Everyday that's what I say
And I come with consciousness as my soul mainstay
All of them, all of them crazy murderers are bound to be prey
Lock, stock, suckin evil man with no delay
Said the moonlight, sunlight's in my way
Twilights from the heights of my roof I send praise
Then poof looking up to the night ask for help
To get up....

So me no need no ganja na'
They only bring me down
Burn away my brain away my brain is too compound
Elevating my soul, purifying my sound
Like the sun of my sun ray burnin up thru the clouds
Torah good for my brain let it rain till I drown
Thunder let the blessings come down
It found my soul, raised it up from the ground x 2
I said a moonlight, sunlight's in my way
Twilights from the heights of my roof I send praise
Then poof looking up to the night ask for help
To get up....

Said I be rippin' through them lyrics, I be rippin' through them words
Explain like physics leavin your vision blurred
All of them, all of them righteous men there is no need to worry
Crush into the wicked in my way with all these fists of fury

I study rhymes all day
Everyday that's what I say
And I come with consciousness as my soul mainstay
All of them, all of them crazy murderers are bound to be prey
Lock, stock, suckin', evil man with no delay
I'm dropin' bombs on your moms
Yeah to your dismay
In every single way each and a each and every day
I sit back relax and listen to the music play
Put the headphones on my head a yes I bump and I sway
And I be rhyming through your house, yes I be rhyming through your room
Explain like physics leavin your conscious doomed
Kaboom in the morning and the afternoon
Said the moonlight, sunlight's in my way
Twilights from the heights of my roof I send praise
Then poof looking up to the night ask for help
To get up.... x33
