Matt Pond PA, If You Want Blood

If you want blood
I'll show you the way
In a crowd I lost my voice
I looked around but no one noticed

If you want blood
I'll give it right back
bottles become broken glass
and points you make are not well taken

By the way you looked I knew you'd be leaving somehow
never seeing in the sunlight
either way it goes I know
the night makes faces
that all come in places
during the summer

If you want blood
I'll show you the way
At a red light I found I was not the one that I would go with
If you want blood
it's if you want blood
I've found falling can be painless
when you need to get things going

By the way you looked
I knew you'd be leaving somehow never seeing in the sunlight
Either way it goes I know it makes no difference it seems all so senseless in the summer

I think I'll take these parties
The kind that seem like
they can't get started
Dyed hair with the black striped dresses
It's everything that you love forgetting

If you want blood
yeah if you want blood
