

# Matt Pond PA, New Kehoe, Nj

the words are made with magnets  
speaking simple information  
with the consequences open  
there is nothing more to hear

by the end the car was making noises that made more  
sense than a signal in plain view  
exaggerated lines for eyes

in between the shakes and clicks is less than  
half a second  
which is more time than is used  
to build upon the engines effort
