

# Mazzy Star, Still Cold

You really had a million hearts to break  
All those times I never left you in the moonlight  
How come there's always someone else driving your car  
Taking you different places, in the sunlight

Still cold like the stars  
That's just the way you are  
Still cold like the stars

You used to say your heart felt like a stone  
Now everything you ever wanted is your own  
Still cold like the stars  
That's just the way you are  
Still cold like the stars
