

Media Lab, As The Stars Melt Away

As the stars melt away from me understand this is all I see
I feel so alone today
Take my heart and bleed it right in front of me
I know - your gone
I know - I've lost and I feel like I'm rotting away
As the stars melt away from me understand this is all I see
All the skies appear to bleed
Take my life and burn it right in front of me
Set the stage for agony, loving you is killing me
Its all true, beginning to relive you
Smother out the sun divide
Loving you has drained my life
Burn my eyes
Take away these bright red skies
Smother out the sun divide
Loving you has drained my life
