

Megadeth, Interrogation Contraption

The clouds prepare for combat
In the ever expanding world
Of nuclear attacks and global destruction
An invisible circle of silence
Errupts inside your abdomen
Eye to eye no one speaks
Who will be more obscure
Evil lingers around us
And no one seeks to destroys us
Prepare for interrogation
With the immaculate nucleus
With imminent imaginations
Through the magic of fascination

Do not go outside the invisible door
'Cause nobody else seems to disappear
As long as all of us are there
Throughout the wear and tear
Of dreams past and present

Here we are on the planet Evilville
Put your head above the sky and detonate
All your phantom fears and all of your dangers that might kill
And why do I the power, however
To destroy our destiny
And the power to overcome this buzzkill
Comes from underneath the earth

Do not go outside the invisible door
'Cause nobody else seems to disappear
As long as all of us are there
Throughout the wear and tear
Of dreams past and present
