

# Megadeth, Mastermind

Anonymous existence, rendered useless to mankind  
Destroy the logic volume in the confines of the mind  
Enmassed and purposeless, marching in a perfect line  
Neo-neuro torture, mental meltdown, a heinous crime

Mastermind, I tell you what to think  
Mastermind, I tell you what you need  
Mastermind, I tell you what to feel  
Mastermind

Invade the core of souls to wipe the lives away  
Design vacant beings, welcome the inhuman race  
Encrypted horror codes, directive psyche overwrite  
Processing brains to pabulum,  
Delete and format living drives

Mastermind, I tell you what to think  
Mastermind, I tell you what you need  
Mastermind, I tell you what to feel  
Mastermind, I tell you what's real

Hail to the power age, lest the viral hour comes  
Raise the flag of voltage, bow to circuitry unknown  
Kneel before the processor, the lords of static laugh  
Electrons in submission, you must know who I am

I tell you what to think  
I don't care what you thought  
I tell you what to get  
I don't care what you got  
I tell you what to think  
I don't care what you thought  
I tell you what to get  
I don't care  
I don't care what you got

Mastermind, I tell you what to think (I don't care what you got)  
Mastermind, I tell you what you need  
Mastermind, I tell you what to feel (I don't care, I don't care what you got)
