

# Melodifestivalen, Bubbles - Blow the spot

It's getting hot  
We blow the spot

Party's getting started  
Lights are getting low  
Something is about to explode  
Souls are shaken  
And hearts are taken  
Around you, yeah yeah

Come a little closer  
And moving to the vibe  
Show me that you're up for the ride  
The bass is pumping  
And people jumping  
Around you, yeah yeah

So you got what it takes?  
Can you handle the case?  
Then everything will be alright  
Everybody's going  
Down! Down! Down!

(When we're grooving)

Bouncing  
Getting it on to the music  
We blow the spot  
Bouncing  
Making it right while we crusing  
It's getting hot  
We blow the spot

Cranking up the level  
Speeding down the lane  
Everybody's going insane  
All the girls are flying  
And the boys are trying  
Around you, yeah eh

Making our connections  
Talking through the eyes  
Knowing that tonight is the night  
And it feels so good  
Like I know it would  
Around you, ooh ooh ooh

So you got what it takes?  
Can you handle the case?  
Then everything will be alright  
Everybody's going  
Down! Down! Down!

(When we're grooving)

Bouncing  
Getting it on to the music  
We blow the spot  
Bouncing  
Making it right while we crusing  
It's getting hot  
We blow the spot!

Swing it, shake it

Sliding to the left  
We're moving and kicking  
Sliding to the right  
Come on

So you got what it takes?  
Can you handle the case?  
Then everything will be alright  
Down! Down! Down!

(When we're grooving)

Bouncing  
Getting it on to the music (to the music)  
We blow the spot  
Bouncing  
Making it right while we crusing  
It's getting hot  
We blow the spot!

Bouncing  
Getting it on to the music  
We blow the spot (we blow the spot)  
BUBBLES  
Making it right while we crusing  
It's getting hot  
We blow the spot!
