Melodifestivalen, Bubbles - Blow the spot

It's getting hot We blow the spot

Party's getting started Lights are getting low Something is about to explode Souls are shaken And hearts are taken Around you, yeah yeah

Come a little closer
And moving to the vibe
Show me that you're up for the ride
The bass is pumping
And people jumping
Around you, yeah yeah

So you got what it takes? Can you handle the case? Then everything will be alright Everybody's going Down! Down! Down!

(When we're grooving)

Bouncing
Getting it on to the music
We blow the spot
Bouncing
Making it right while we crusing
It's getting hot
We blow the spot

Cranking up the level Speeding down the lane Everybody's going insane All the girls are flying And the boys are trying Around you, yeah eh

Making our connections
Talking through the eyes
Knowing that tonight is the night
And it feels so good
Like I know it would
Around you, ooh ooh

So you got what it takes? Can you handle the case? Then everything will be alright Everybody's going Down! Down! Down!

(When we're grooving)

Bouncing
Getting it on to the music
We blow the spot
Bouncing
Making it right while we crusing
It's getting hot
We blow the spot!

Swing it, shake it

Sliding to the left We're moving and kicking Sliding to the right Come on

So you got what it takes? Can you handle the case? Then everything will be alright Down! Down! Down!

(When we're grooving)

Bouncing
Getting it on to the music (to the music)
We blow the spot
Bouncing
Making it right while we crusing
It's getting hot
We blow the spot!

Bouncing
Getting it on to the music
We blow the spot (we blow the spot)
BUBBLES
Making it right while we crusing
It's getting hot
We blow the spot!
