

# Memphis May Fire, Destiny For The Willing

We are alive the last men standing from the fight  
We are the chosen and we claim your life tonight  
Breathe in the light that surrounds us  
Can you feel it take the risk but know the consequence  
Know the consequence

If we were made for this  
Who are we to act any differently  
No one said this would be easy  
Never look back leave it all behind

The clouds overhead have come and gone with the storm  
Now let me show you the truth

We were born into the open sky  
Where heroes are created  
And legends never die  
We were born into the open sky  
Where heroes are created  
And legends never die

If we were made for this  
Who are we to act any differently  
No one said this would be easy  
Never look back leave it all behind

There is hope in every open eye  
So live your life like you're ready to die  
Let them have everything but your pride  
Hold your ground when the sun sets tonight is the night

Darkest night comes just before dawn

Darkest night comes just before the dawn  
And trust me son and trust me son

A darkest night comes just before the dawn  
And trust me son we will make it our alive
