

# Mercury Rising, Light to Grow

Constantly I find myself searching for answers  
Only to learn I didn't really want to know  
But now and then upon a circumstance  
There waits discovery enlightenment we all need light to grow  
Walking empty streets at night silhouette in moonlight  
Petitioning revelation to bring life's frustration down  
Discovery revelation  
Enlightenment to end frustration  
Suddenly I seem so small in my surroundings  
An iota of something so much more  
Eons will erase a man no matter what his victories  
Light breaks through a newly opened door  
To realize I'm just a man helpless in a master plan  
Knowledge an open door  
Infinity a slave no more  
Discovery I must know  
Offer me light to grow  
Supply me the power to make it so  
Supply me with light to grow  
Out from life's undertow  
Nourish me with light to grow  
Possibilities expanding all around me  
Even in the depths of my despair  
Fight to gain dominion over feelings that surround me  
Enter reality they vanish in thin air  
Constantly I find myself searching for answers  
Only to learn I didn't really want to know  
But now and then upon a circumstance  
There waits discovery enlightenment we all need light to grow
