

Merril Bainbridge, Stars Collide

We can now make the stars collide
If we really want to
And turn the whole thing upside down
Through endless days eternal night
We could last forever
Or just until we hit the ground
Time goes by
But together you and I
We could see the end of a century
Walking by the light
Of the milky way tonight
By the light
Of the milky way tonight
So many people left behind
Still we seem to be here
It's just a wave we have to ride
And all the pieces in your mind
Just like stars colliding
So bright they almost burn my eyes
Time goes by
But together you and I
We could see the end of a century
Walking by the light
Of the milky way tonight
By the light
Of the milky way tonight
If we fall too far
We might never see the stars
If we climb too high
I won't see you by the light
Of the milky way tonight
By the light
Of the milky way tonight
