

# Mest, I'm Stuck

here's a little story about my life  
I was a normal kid livin' it right  
and I don't really know just what it was  
but now I know I'm fucked up just because

I better not take another sip  
or this time it might be it  
I may never see another day  
I better not take another sip  
or this time it might be it  
I may have my life taken away

I lost myself a day ago  
where I was I don't know  
tomorrow I may find again the place that I've always been  
in the darkness all alone that's the place that I always go  
you'll always find me hiding there  
smokin' a J and drinkin' a beer

I better not take another sip  
or this time it might be it  
I may never see another day  
I better not take another sip  
or this time it might be it  
I may have my life taken away

(lets go)

where I'm headed I don't really care  
just as long as there all there  
cause I know one day my life will be taken away  
and that day might be today

I better not take another sip  
or this time it might be it  
I may never see another day  
I better not take another sip  
or this time it might be it  
I may have my life taken away  
I may have my life taken away  
I may have my life taken away  
I may have my life taken away  
and that day might be today
