

Michael Johnston, Gravity

I had it for you - one afternoon
Never thought I'd be chasing somebody like you
You make me crazy - I'm on the moon
My gravity is broke when I am missing you

I fly through the universe - I'm in reverse
I want to take you with me cuz I think I can
Show you a better way - to run away
Don't tell me you were lonely

Let me take you to the apogee
We can be anyone we want to be
We could go on and on
Until we run out of gravity (We could go on and on)
Until we run out of gravity
We could be human and we could be free

We could be floating in the galaxy
We could go on and on
Until we run out of gravity
Until we run out of gravity

I think about you - when you're away
I try to guess if you were here what you would say
My heart is racing - I'm letting go I
Never thought I'd be leaving everything I know

I fly through the universe - there's nothing worse
Than wishing things were different I just want you to
Show me another way - we'll be ok
Don't tell me you were lonely

Let me take you to the apogee
We can be anyone we want to be
We could go on and on
Until we run out of gravity (We could go on and on)
Until we run out of gravity

We could be human and we could be free
We could be floating in the galaxy
We could go on and on
Until we run out of gravity
Until we run out of gravity

I never thought it'd be true
I think I'm falling for you
You took my hand and we flew
Oh we'll never beat this view
I never thought it'd be true
I think I'm falling for you
You took my hand and we flew
Oh we'll never beat this view

Until we run out of gravity
(Until we run out of gravity)
We could be human and we could be free
We could be floating in the galaxy
We could go on and on
Until we run out of gravity
Until we run out of gravity

Let me take you to the apogee
We can be anyone we want to be
We can go on and on

We can go on and on and on
