

Midge Ure, Cold, Cold Heart

Come stand beside me
Come gather 'round me
Come stand beside me
Come gather 'round me
And heat this cold, cold heart

When I was just a boy
The voice of an angel came to me
It said "Your future is there inside your cold, cold heart"

But I was just a boy
And a boy sees what he wants to see
And something to share inside this cold, cold heart

Somebody should have told me
When you're born to this world
Your life starts slipping away

Come stand beside me
Come gather 'round me
Come stand beside me
Come gather 'round me
And heat this cold, cold heart

With the love inside me
With arms around me
With the love inside me
With arms around me
We'll heat this cold, cold heart

When I became a man
The voice of the devil said to me, it said
"Forever you'll live inside your cold, cold heart"

But I'm a better man
Where's a man who wants to be free
To have someone to care about this cold, cold heart

Somebody should have loved me
Should have taken me on
Instead of taking away

Come stand beside me
Come gather 'round me
Come stand beside me
Come gather 'round me
And heat this cold, cold heart

With the love inside me
With arms around me
With the love inside me
With arms around me
We'll heat this cold, cold heart

Come stand beside me
Come gather 'round me
Come stand beside me
Come gather 'round me
And heat this cold, cold heart

With the love inside me
With arms around me
With the love inside me
With arms around me

We'll heat this cold, cold heart

Come stand beside me
Come gather 'round me
Come stand beside me
Come gather 'round me
And heat this cold, cold heart

With the love inside me
With arms around me
With the love inside me
With arms around me
We'll heat this cold, cold heart
