

# Mike And The Mechanics, All the light I need

I read all the philosophies  
The theory ideologies  
They leave me cold  
I sit around at tables talking  
long into the night and when we're  
walking home  
You take me by the hand  
You say you understand  
And this is all the light I need  
I know we've had our ups and downs  
I play the fool I play the clown  
Just like a man  
I think it wouldn't be so bad  
If only you believed I had some  
kind of plan  
But as the evening fades  
You say you're going to stay  
And this is all the light I need  
And these are all the clothes  
that keep me warm  
You come to me and then  
You love me once again  
And this is all the light I need  
When we found the going tough  
You always seemed to have enough  
To pull us through  
Although I never mention it  
I often wonder how I'd manage  
without you  
You say that in the end  
You'll always be my friend  
And this is all the light I need  
And these are all the clothes that  
keep me warm  
You come to me and then  
You love me once again  
And this is all the light I need  
You say that in the end  
You'll always be my friend  
And this is all the light I need  
And these are all the clothes that  
keep me warm  
You come to me and then  
You love me once again  
And this is all the light I need  
This is all the light I need  
And these are all the clothes that  
keep me warm  
This is all the light I need  
And these are all the clothes  
that keep me warm  
This is all the light I need
