

Mike Ans The Mechanics, Help Me

Help me, help me understand
I still find it hard to comprehend.
Tell me, tell me who I am,
The one who shares your life or just a friend.
I can read your heart like an open book,
But I can't believe the things you do...
Can't believe the things you do.
Show me, show me what you mean,
Do you really know or do you care.
You don't know me, you think I can't see
Promises you break when I'm not there.
I can read your face like an open book,
But I can't believe the things you do...
Can't believe the things you do.

(Interlude)

When your alone and looking out across the years,
Your caught in space, your caught in time.
But when you add up all the laughter and the tears,
I hope your futhure will be mine
Help me, help me understand
I still find it hard to comprehend.
Tell me, tell me who I am,
The one who shares your life or just a friend,
Just a friend...
