

Milky Chance, It Is What It Is

New day it's okay
Imma jump in the river
Underwater dreams, good God they give me shivers
My fantasy's been good to me
I used to care if they were true and wonder what they mean
Now I just let it go

Do you remember those skies on the day that we made it
I can't help thinking that I have to let go and I hate it
My enemy is a friend of me
I used to care if you were there but now I let it be
No way to turn around

It is what it is
And I know it's all that we got
It is what it is
And I know it feels like a lot
It what it is
And I'm tired of trying to make it be what it's not

Do you remember those skies on the day that we made it
I can't help thinking that I have to let go and I hate it
My enemy is a friend of me
I used to care if you were there but now I let it be
No way to turn around

It is what it is
And I know it's all that we got
It is what it is
And I know it feels like a lot
It what it is
And I'm tired of trying to make it be what it's not
