Ministry, Death And Destruction (Remix)

You go to war without a care in the world No matter what the cost Must be a reason for all this treason It never mattered if we won or lost

You want it You got it

You break it

You bought it

Stuck in the middle of a civil war Well what the fuck do you expect Our occupation of other nations

Is bound to have a fucking violent effect

You want it

You got it

You brake it

You bought it

So what, you always try to go to war

but you never went

It doesn't matter if blood is splattered

We make a killing off the ones that we send

You want it

You got it

You brake it

You bought it
