

Mis-Teeq, Secrets Of The Night

Theres something we gotta tell ya - we're not like other girls,
Shape the light and away we go.

Midnight dim the light-gonna be a full moon tonight (hey)
Gonna cause a lot of rage alright
(alright)

I can see a lot of prey inside, knock knock check the locks
Better stay inside cos we cant be stoped (cant be stoped)
Tick tock better watch the clock, hearts racing cos we're feeling hot
We're creatures of the night, so dont be fooled by our shape or size
We're coming after you so hide
And if you have any other plans you'd better forget about it

[chorus]

A body, needs more and more, cant sleep, till i get it all,
The streets ain't safe any more dont speak, cant hear you call
So sweat, but dangerous you'll see if your curious
Better believe the secrets of the night
Better believe, better belive

On track creeping up (creeping up)

Think your ready but i bet your not (bet your not)

Gonna give you an electric shock. gonna hit you with a million watts

MC:i'm gonna hit you full blow thats a fact

I'm gonna get you with a full contact like a bat out of hell its a natural

Fact, the mystery of mis-teeq be wary of that.

The mystery is our disguise look deep into our eyes you'll find a big

Suprise,theres no way out before sunrise

And if you have any other plans forget about it

[chorus]

[RAP:] now i'd be the movement in the night

You never thought that real beings come alive

But i proved that we can rock it frome the dark side

And when i'm hungry it's time for me to take a bite

For those who know but try not to believe

I'm coming round the cornor dont stop or breathe

Cos if i ever smell the blood running through your veins

You'll never ever ever live to see another day

[MC x1]

[chorus x1]

You'd better believe [x2]

Better believe

You'd better believe
