

Modern English, Care About You

There's many things in this whole world,
That everyone should care about,
The way you look into my eyes,
It means everything to me,
If I could tell you how I feel,
But I don't know where to start,
Close to my conscience,
Is where to rest your weary head.

I, I, I care about you,
There's something you just have to know,
I care about you,
I, I, I care about you.

Incredible as it may seem,
You came and filled me up again,
With every possible emotion,
Reach the corners of my mind,
If I could tell you how I feel,
But I don't know where to start,
You are the concentration,
Of my better parts.

I, I, I care about you x6

There's something you just have to know x3
I care about you,
I, I, I care about you (to fade)
