Modern Talking, The night is yours the night is mi

The night is yours, the night is mine I beg you baby, take your time It's like paradise See your magic eyes Feel the need in me The night is yours, the night is mine I beg your baby, take your time Heaven in your eyes Takes me to the sky I'm in love with you Love takes time, it's hard to find That's true Not a game you play - a night or two Take my heart Let's make it real tonight We'll be dancin' to the pale moonlight Your dreams are real today And now you gonna stay The night is yours... I will try to make your dreams come true Trust me baby, nothing else will do There's no need for you to be so cool Love takes time just like the golden rule Your dreams are real today And now there gonna stay The night is yours... Girl, when I see you smile Imaginations running wild Love makes me feel allright Help me through the night Sometimes you're weak Sometimes you're wild You're a woman You're a child
