

Moe Bandy, She Just Loved The Cheatin' Out Of

Once I had a warm and willing woman
And it never crossed my heart to cross the street
But lately baby's left me cold and hungry
For the kind of love that made me want to cheat

Her woman's intuition must have told her
That I was in to wishing I could leave
Cause the woman just came out in my lady
She just loved the cheatin' out of me
(steel + harmonica)
When a man gets blinded by his passion
His conscience wants to look the other way
Tonight she gave me more than I'd been missing
Cause she loved me till my conscience felt ashamed

Her woman's intuition must have told her...
She just loved the cheatin' out of me
