

Monday Morning, Let's Go

I saw you standing there, its like you vanished in the air
No one knows or even cares
Well you need someone to love you just for you
This love is matchless, this power words cannot express
It's like a sea of tenderness I'm falling in
And there's nothing that I'd rather fall into

CHORUS

Come on with me
Come on with me
I'll take you to a place I know that we can stand
Now that we're standing here
We've got nothing left to fear
This perfect love will always be what I live for
And every day we're growing more and more
Come on with me
Come on with me
I'll take you to a place I know that we can stand
And we'll face this life together hand in hand
And that broken heart it lift you with will mend
Come on, come on lets go
