

Monster Movie, The Stars That Surround You

When I need you and you're my only friend
Then I came to you and pretend
That the stars all around you are almost gone
That the stars all around you are our charm
And there are no easy ways out so I say that I thought When I saw you I'd be caught forever
And we could climb into your grave and sail away for days together

When I'm not with you
You sail to the moon
So I can see you silhouetting from my room
And the stars that surround you
Died so long ago
But the stars surround you
Won't let it show
And there are no easy ways out so
I say that I thought when I saw you I'd be caught forever
And they could climb into your grave and sail away for days together

La? La?. La?. La?
