

# Monster, No One Gets Out Alive

First thing I see, I'm way up here  
Above the clouds, how can it be?  
I'm falling down, right to the ground  
There's no way to save my life  
The wind is cold, it cuts through me  
I see the earth, it's coming near  
In the speed of sound, I touch the ground  
No time to close my eyes  
Then I wake up, tied to this chair  
In a desert highway, that's not fair  
Cause in the distance, I see a truck  
Coming at the speed of light  
I try to escape, but the ropes don't break  
The truck is near, I can read its plate  
There's no time left, feel impact  
No time to close my eyes  
That's the feeling I always get  
When I get up on the stage  
I don't even remember my name  
Yes I'm giving all I have to give  
But that's the living that I choose to live  
Give me my bass and a mike just to get a start  
And no one gets out alive!  
I open my eyes and start to rise  
Something is pushing me up to the skies  
When will it end? the clouds again  
They cut me like ten knives  
But I keep on climbing, the space is near  
That's when I cross the atmosphere  
And at this stage, I disintegrate  
With no time to close my eyes
