

Montgomery John Michael, Love Working On You

You woke up this morning
Changes were taking place
You looked in the mirror
A Smile was all over your face
'Cause out of nowhere someone was there
Who dared to climb those walls you've made
And it's exciting; a little frightening
But, girl, don't you be afraid

CHORUS:

That's just love working
Love working on you
That's just love working
Working on pulling you through
Can't even remember all the sorrow that you left behind
It's a bright new day
There's a bright new way
And your tears have turned into wine
You'll never forget when your eyes met
Or just how clearly you could see
Where the turns are deep in your heart
That led you to believe

CHORUS

BRIDGE:

All of the while you felt forsaken
And all of the while love's been waiting
Waiting

(Guitar Solo)

Suddenly you see how it could be
If we all only felt this way
And for a while, girl, you can see this world
Looking through the eye of faith

CHORUS X 2

That's just love ---- working on you
That's just love working
Working on pulling you through
