

MoonSun, One By One

Like a sky full of lights,
We are here 200 nights.
Stones are falling, men are crawling
We are fighting for our gold.

Bloody hands, we're going slow.
Tight dark shafts, that's all we know.

One by one we're going down
To light the fuse to build our town
In the dark we slave away
To see the light at the end of day
One by one we're going down

How we need your cold embrace
Rails and trails, it's like a race
Stones are falling, men are crawling
All together now, young and old.

Bloody hands, we're going slow.
Tight dark shafts, that's all I know.

One by one we're going down
To light the fuse to build our town
In the dark we slave away
To see the light at the end of day
One by one we're going down

We all are here for our gold.
All night, all day – young and old.

One by one we're going down
To light the fuse to build our town
In the dark we slave away
To see the light at the end of day
One by one we're going down
