## Motion City Soundtrack, Antonia

She makes a lot of abstract art She haggles for the cheapest price She never orders take-out food Before 10 o'clock at night

She's really into snowmobiles She owns a lot of nice flashlights She cares for all the stupid cats That never found their way home

She shaves her legs with Ginsu knives She quotes a lot of Annie Hall She misplaced her virginity Back in 1995

She's what's keeping me alive She's the pizza of my eye Without her near me I would not survive

It gets cold when she's not around I float into our sink and get swallowed up It's so cold when she's not around I wait for her to come home And tell me I'll be fine

She's always eating Captain Crunch She sings a lot of Ben Folds Five She's scared to death of cobra snakes Just like Indiana Jones

She tells the dumbest knock-knock jokes She drinks a lot of Chardonnay She hates the way I comb my hair

But she married me last year She was the bride, I was the groom

I cried a lot and then we spooned Without her in my life I would be doomed

It gets cold when she's not around I float into our sink and get swallowed up It's so cold when she's not around I wait for her to come home And tell me I'll be fine, tell me I'll be fine

She loves the smell of Christmas trees She sneezes when she sees bright lights She fainted on the kitchen floor When her father passed away

Our baby girl is here to stay And when the little lady grows up I hope that she will be just like her mother
