## Motion City Soundtrack, Fell In Love Without You

Last night I fell in love without you. I waved goodbye to that heart of mine Beating solo on your lawn

Every aching wound will cauterize and bruise In memory of what we used to call in love And only time will tell if violins will swell In memory of what we used to call in love Used to call it love

Last night I fell in love without you The cou de gras that set me off Would've made for decent fiction

Every aching wound will cauterize and bruise In memory of what we used to call in love And only time will tell if violins will swell In memory of what we used to call in love Used to call it...

Last night I fell in love without you The stars at night aren't as big and bright As you make them out to be

Every aching wound will cauterize and bruise In memory of what we used to call in love And only time will tell if violins will swell In memory of what we used to call in love In memory of when we used to call it love
