

# Mr. Mister, Hunters Of The Night

He's a lean and hungry hunter, on the street tonight the fire's bright  
She's in his sights  
She's a lonely little dancer, out to find a daring new romance  
The girl takes a chance

Chorus:

They're hunters of the night, find their love where they might  
We're all hunters of the night

Yeah

She can see her lonely stranger, standing in the cold street corner light  
There in the night  
She can feel his arms surround her, wanting this embrace to never end  
Still once again

(chorus)

Ohhh-ohhh, we're all hunters of the night

(Solo)

See the lean and hungry hunter, standing in the cold street corner light  
There in the night  
She can feel his arms surround her, wanting this embrace to never end  
Still once again

(chorus)

We are hunters, we all hunt the night, findin' love wherever they might  
We're all hunters, we're hunters of the night  
Ohhh-ohhh, we're all hunters of the night  
Ohhh-ohhh, we're all hunters of the night  
Ohhh, we hunt the night, we hunt the night, we hunt the night... (to fade)
