

# Mustard, Nick Jonas, Anywhere

what's better than the time being  
dark skies never scare me  
fallin I'll be right behind ya  
it's still me  
like the very first time

something had to be this hard  
something that I really want you  
something had to be so far  
something that I really wanted

you could be anywhere right now  
I taint hard to see  
I'll be your light  
if you say the words for me  
you could be anywhere right now  
it's aint hard to see  
I'll be your light  
if you say the words for me

because I've loved you  
it's not important any longer  
where are we even fighting over  
it's not important any longer

something had to be this hard  
something that I really want you  
something had to be so far  
something that I really wanted

you could be anywhere right now  
I taint hard to see  
I'll be your light  
if you say the words for me  
you could be anywhere right now  
it's aint hard to see  
I'll be your light  
if you say the words for me

I don't know what to do  
it you're not right beside me  
I had to move  
byrt, baby you know  
where to find me
