

MuteMath, Noticed

Careful when you open
It's easy to be broken
In the strangest fashion
You start a chain reaction
When you look my way
Somethings bound in a way
And I wonder if I ever felt this before

And all this time it was staring me blind
I can't believe i've never noticed my heart before

You are reaching something that is beating
I can't believe i've never noticed my heart before
Over and again they sink out of my skin
I can't believe i've never noticed my heart before

At least it was never so obvious as
Now or never
You put me back together
In the perfect fashion
Just watch my hearts reaction
This part of you is nothing that I'm used to
But I wont close my eyes cause they're onto you
And all this time it was staring me blind
I can't believe i've never noticed my heart before

The only time I noticed my heart is when I noticed you did, you did
