

MxPx, Don't Forget Me (When You're Gone)

No I'm not mad about you
Just a little sad without you
I know it's mostly all my fault

I drive myself insane
And there's no one else to blame
And I know I hurt you time and time again

And don't forget me when you're gone
And don't forget me when you're gone

Cause my heart still hurts
My heart still hurts
My heart still hurts

My heart still hurts
My heart still hurts

You stop my world from turning
You could make the sun stop burning
That's something I could never do

And don't forget me when you're gone
And don't forget me when you're gone

Cause my heart still hurts
My heart still hurts
My heart still hurts

My heart still hurts
My heart still hurts
My heart still hurts

There's something in your eyes that saw through my disguise
And just kept on right on looking through

Cause my heart still hurts
My heart still hurts
My heart still hurts
My heart still hurts

My heart still hurts
My heart still hurts.
