

# MxPx, Make Up Your Mind

Make up your mind,  
Cause no ones gonna do it for you this time  
Make up your mind,  
Mabey you're afraid of the things you'll find

You say that nothing really matters to you,  
You say that nothing really matters to you, never has,  
You say that nothing really matters to you, never has, never will

It's all made up in your head,  
The life your living is overrated  
It's all made up in your head,  
There's nothing you can do cause it left you stranded

You say that nothing really matters to you,  
You say that nothing really matters to you, never has,  
You say that nothing really matters to you, never has, never will

From morning, noon, and night,  
Til the sun goes out of sight  
No one knows what's yet to come,  
Or what's about to come undone

You say that nothing really matters to you,  
You say that nothing really matters to you, never has,  
You say that nothing really matters to you, never has, never will

You say that nothing really matters to you,  
You say that nothing really matters, to you, never has,  
You say that nothing really matters to you, never has, never will

Nothing really matters to you, never has, never will  
Nothing really matters to you, never has, never will  
Nothing really matters to you, never has, never will.
