

N*E*R*D*, Am i high

La la la la la la la

La la la la la

la la la la

Listen

La la la

Hey

Didnt you know I can help or hurt you

So theres no reason to lie

I bet you let those other niggas jerk you

Convince you that they are fly

I never said I was an angel

Said but I aint like those other guys

Listen

Youre convinced that our experience rearranged you

Well maybe you should reexamine

How you tried

Am I High

Am I High

Am I High

I think Ive loved you since our high school

You only wanted friends of mine

So when they replied

Her shes cool

Only then you gave our friendship time

You wont say it but you think Im changin

Is it because the whole world calls me drugs

Didnt I say I can help or hurt you

You should be paranoid without me

and with me feel a buzz

Is that cocky or what

Am I High

Am I High

Am I High

Its the kinda high that got me leanin

120 speedin in the rain

Meaning of a hydroplane

Play both sides of the field

See I know pain

Keep em high like Kurt Cobain

Listen

Im known for speaking my mind

Known for fleeing from the scene of a crime

Eyes redder than the beam of my nine

Eyes redder than the scene of that crime

All for the love of the lime

Im so high

Insinuating youre not that way

I see how you look and use your eyes

But when I ask you can I jump in

Then you start again with the lines

But if I dare you youd blow a kiss to another

Though my friends have no idea who you could be

Dont worry I would never tell another

But I ate your pussy as you layed there beside her yes she was asleep

Am I High

Am I High

Am I High

Why am I sitting here

Peering the sky

Is there something inside of me or am I high

From when we talk on the phone til when we fuck

This sounds like deep lust to me

But I get high on your love

Am I High
