

'N Sync, Forever young

Let us live eternally
We can reach our destiny
We will feast in harmony as one
Forever young
Though they teach us sacrifice
We will never compromise
We are here until our work is done
Forever young
Forever young ...
Whatever may come falling down
Will never break our solid ground
A million hours until the game is won
Forever young
Until we've learned what love can bring
Well our immortal voice will ring
And through the clouds we'll always find the sun
Forever young
Forever young ...
We're the future of the world
With love let's take our stand
For all that we believe
Forever ever young
Forever young ...
