

# N2U, Ain't That Bad

It's been a while ya trippin babe  
How you wanna stay away  
Missin you like crazy  
Tell me what's the deal lady

Can we ease up this pain

This thing that we fought about  
Ain't worth the love we talk about  
We got a bond and it takes two to work it out

Can't give it up no way

I am made for you, you were made for me

You're soul is the most precious thing that I've held  
We're connected here by faith, that's why you're my mate

Can we drop this now and just let this be

A perfect man what a goal would a perfect woman hold  
Such a better though to the one who loves her

What I gotta do to make you smile  
Cause you know I haven't seen you laughing in a while  
Baby what we going through ain't that bad

What I gotta do to make ya see  
When I'm hurting you I'm hurting every part of me  
Tell me can we back that we had  
What we going through ain't bad

I can role play if you learn to play a role  
It's a fifty/fifty thing come on let's begin  
We got behind so behind

We got things to see things and places to go  
So much catching up to do baby girl come on  
Let's be one again

What I gotta say to make you smile  
Cause you know I haven't seen you laughing in a while  
Baby what we going through ain't that bad

And what I gotta do to make ya see  
When I'm hurting you I'm hurting every part of me  
Tell me can we back that we had  
What we going through ain't bad

Can we try to make things right  
What I gotta say to make you smile  
Baby tell me  
Oh oh oh baby

What I gotta do to make you smile  
Cause you know I haven't seen you laughing in a while  
Baby what we going through ain't that bad

What I gotta do to make ya see  
When I'm hurting you I'm hurting every part of me  
Tell me can we back that we had  
What we going through ain't bad

What I gotta do to make you smile

Cause you know I haven't seen you laughing in a while  
Baby what we going through ain't that bad
