

Nadia Gifford, In Your Voice

When you're down and low
Try looking at the sun
Keep your head high and everything is alright
When you're lost and confused
You might be able to
Find the answers that you want above the clouds

When you're sad and blue
Look into the blue sky
And your blueness might be soaked into the sky
When you feel like nobody
Just look at the stars
And remember they are twinkling for you

In your eyes I see a pond of trouble
You've been hiding from us all the time
But you can't keep it all in forever
Can't you see we're all right here for you?

Now let me tell you one thing
We're all right here for you and only you
We will always sing for you
So why not sing along with us?

Let go of all your troubles
Be free of your mind and let it go
It's funny how things turn around
Just by singing out loud

Because the fire is right there in your voice
Listen to it, oh listen to it...
The vision of your own dreams
You might see it through
It's in your voice...

Let go of all your troubles
Be free of your mind and let it go
It's funny how things turn around
Just by singing out loud

Let go of all your troubles
There ain't nothin' like singing out loud like this
Oh, it's funny how things turn around
When we're all singing as one, as one

Let go of all your troubles
Be free of your mind and let it go
And we will sing for you, my friend
If you keep on listening 'til the end

La la la lala lalaa
There ain't nothin' like singing out loud like this
La la la lala lalaa
So why not sing along with us?

La la la lala lalaa...
