

# Nakedheart, See The Light

Seperate ourselves from what is truth the feelings inside so numb  
Must step back remember take the time all that effort deluded  
All that time and all that effort everything's clear everything's hazy  
Gotta step off contemplate to see what it is that I'm tasting

Chorus:

Come on and open your eyes  
Open and see the light

Come on... open up your thinking it's such a hard road  
You wonder what this is all for you're only seeing in grey  
You're only living in grey  
Gonna take the time gonna make it mine
