

# Name Taken, Drive Drive Drive

Gotta gotta get out alive  
To know justt once what its like  
to have my own breath  
and we know its no use to  
pretend that theres another way  
theres no other way  
to go  
about this you know

We can drive far away  
forget the way back  
We can start over  
We could drive far away  
We can forget the way back  
We can start over

We stood on top for awhile  
with your bad ideas  
you know that this is serious  
and im not alone.  
Its no use to  
pretend that theres another way  
to go  
about this you know.

We can drive far away  
We can forget the way back  
We can start over  
We could drive far away  
forget the way back  
we can start over

All thats in the ground,  
reach for the surface  
All thats good is in the ground buried below us

We can drive far away  
We can forget the way back  
We can start over  
We could drive far away  
We can forget the way back  
We can start over
