

# Nana Mouskouri, Like A Main Theme

I am like a song that hasn't been completely written  
But my life is more than half way through a verse  
I mean to say that I'm confused but it's been worse  
And I feel like there is a chorus on the way  
Like a main theme when the melody comes through  
Kinda tells you what the song is going to be  
But I love to know just what I'm going to do

I am in the middle  
In the middle of a riddle  
Just wondering how can life go through  
Then all at once I look around and I see you  
Then I feel like there's a chorus on the way  
Like a main theme, when the melody comes through  
Kinda tells you what your song is going to do  
In the middle of my riddle there's a goof

Now we're close together  
Like the hands of time at midnight  
At the moment when tomorrow meets today  
I've got a feeling that the answer's on its way  
Got a feeling that my future's here to stay  
Like a main theme when the melody comes through  
Kinda tells you what your song is going to do  
Kinda tells me that I'll sing my song for you

Like a main theme  
When the melody comes through
