

# Nasum, Darkness Falls

It came alive in the wreckage  
It broke all shackles ever forged  
It came so close to the carnage  
It carried our remains through the visions of silence, starvation and subjugations

To bring us back to life  
To unveil the dark

It fought for us in the battles  
It overpowered every evil force  
It gave us strength when it mattered  
It showed the way through the divisions of hatred, damnation and subterfuge

To make us whole again  
To unveil the dark

When darkness falls the earth will quake  
Through the cracks we'll see the light  
When darkness falls we must awake  
We can't give up, we have to fight
